Temaline DW

SOLVENT-FREE, CORROSION-RESISTANT
PROTECTION FOR POTABLE WATER
TANKS, CISTERNS, AND BASINS

Superior potable water protection

TEMALINE DW PROVIDES A
SOLVENT-FREE, EASY-TO-
CLEAN COATING WITH A LONG
MAINTENANCE INTERVAL

Extend the life of potable water tanks

Temaline DW is a safe and corrosion-resistant solution to protect potable water tanks, cisterns, and basins. Unlike standard epoxy coatings, Temaline DW is 100% solvent and benzyl alcohol free, meaning it doesn't affect the taste, smell, or appearance of water. It is also easy to clean, resists most common cleaning agents, and has a long maintenance interval.

Temaline DW is approved by the Water Regulations Advisory Scheme (WRAS) for use on surfaces exposed to water of up to 23°C. Its outstanding corrosion resistance extends the life of coated surfaces and reduces life-cycle costs, while its light color makes inspecting coated surfaces easier.

For application instructions please refer to the product data sheet.
